

FUEL SENSOR MONITOR FUEL LEVEL TO REDUCE FUEL COSTS

Fuel Tracking System

The larger your fleet, the higher impact reducing fuel costs can have on your bottom line. Our fleet management software allows you to identify all the inefficiencies in your operations on a per-vehicle basis. You'll be able to make clearer decisions about reducing fuel costs and the SilverStar software will allow you to enforce efficient saving policies through 24/7 fuel tank monitoring

The SilverStar GPS Fuel Tracking Solution gives you the ability to chart and browse relevant performance metrics including number of stops, elapsed travel time, and total miles traveled. Clear and easy to read charts and graphs detail exactly how individual drivers or your entire fleet perform on a daily, weekly, monthly or annual basis, providing invaluable insight into your fleet operations

Our tried and tested fuel sensors have helped many of our customers increase their productivity and reduce petrol and diesel costs regularly.

How do we REDUCE your Fleet's Fuel Costs?

- ✓ Detailed reporting on miles-per-kilometer for each vehicle in your fleet.
- ✓ Visual reports and graphs on vehicle activity including fuel consumption, trips and engine running time.
- ✓ Automatic alerts using SMS and email keep you informed in Real-time on fleet activities that could affect your fuel costs.

Find out just how easy it is to get started!

Tracking your fuel consumption has never been easier. Whether you operate a fleet of just a few vehicles in one site, or thousands of vehicles roaming dozens of sites, you will find solutions that meet your requirements as well as your budget. All we do is install the fuel sensor and the GPS tracker unit and let you drive away. SilverStar automatically and transparently captures fuel and vehicle data and reports this data to you in an easy to read format – you can start saving immediately.

Some of our Fuel Monitoring Tools:

- ✓ Real-time refuel alert with Location & Map
- ✓ Real-time pilferage alert with Location & Map
- ✓ Real-time fuel level Monitoring in Tank
- ✓ Fuel Reserve Alert
- ✓ Fuel consumption by trip
- ✓ Fuel volume at Trip Start
- ✓ Fuel volume at Trip Finish
- ✓ Total Fuel Consumption by trip
- ✓ Total Refuel Volume
- ✓ Total Drain Volume
- ✓ Fuel rate per hour
- ✓ Fuel rate per km

How can the SilverStar Fuel Monitoring system help you?

- ✓ Cut fuel consumption by up to 15%
- ✓ Provide 24/7 unattended yet secure access to fuel
- ✓ Reduce fuel consumption by cutting down vehicle idling
- ✓ Check mileage performance to see if any sudden fall in mileage occurs
- ✓ Enhance safety by immediate notification of storage tanks leaks
- ✓ Stop fuel theft by monitoring sudden drop in fuel level
- ✓ Stop partial fuelling at petrol pump
- ✓ Eliminate misuse of vehicle for private use
- ✓ Provide driver with the shortest route and directions

Our Fuel Monitoring System consists of these three main components:

- ✓ Fuel level sensor (special analog or digital fuel level sensor)
- ✓ Special device for storing data from fuel level sensor (fuel data logger)
- ✓ The SilverStar fuel monitoring software for storing all fuel data and analyzing it.
